Objective:

Aspiring Full Stack Web Developer seeking an entry-level position to leverage my work experience, self-paced learning, hands-on boot camp training, and self-initiated projects to contribute effectively to a dynamic development team. Eager to apply my programming skills, version control proficiency, API management experience, and database knowledge to create innovative web applications.

Education:

BSc in Computer Science from the University of Asmara
Full Stack Web Development Bootcamp
Full Stack Web Development (MERN) Program

- Completed an intensive full-stack web development boot camp with a strong focus on modern web technologies and best practices.
- Gained expertise in frontend and backend development, including responsive web design, server-side scripting, and database management.

Technical Skills:

Programming Languages: JavaScript, HTML5, CSS3
Frontend Development: React.js
Backend Development: Node.js, Express.js
Database Management: MS SQL, MySQL, PostgreSQL
Version Control: Git, GitHub
APIs: RESTful APIs, JSON, Postman
Tools: Visual Studio Code, Command Line
Web Development: Responsive Design, Web Security
Operating Systems: Windows, macOS, Linux/Unix

Projects:

1. E-commerce Website (Team Project)
 - Collaborated with a team of developers to create a fully functional e-commerce website using the MERN stack (Express.js, React.js, Node.js).

- Implemented user authentication, product catalog, and shopping cart functionality.
- Utilized Git for version control and collaborated on GitHub to manage project development.

2. Portfolio Website (Solo Project)

- Developed a personal portfolio website from scratch using HTML, CSS, and JavaScript.
- Designed a responsive and visually appealing layout to showcase projects, skills, and contact information.

3. Weather App (Solo Project)

- Created a weather application using JavaScript and integrated with a weather API.
- Allowed users to search for weather conditions in different locations and displayed the results in a user-friendly interface.

Training and Certifications:

- BSc in Computer Science from Asmara University.
- Completed a comprehensive self-paced full-stack web development course covering frontend and backend technologies, responsive design, and web security.
- Earned a certificate of completion for [Bootcamp Provider Name]'s Full Stack Web Development Bootcamp.

Experience:

Project work with a team group for an online food ordering System

As a junior full-stack developer, I recognized the need to gain practical experience and collaborate with like-minded peers to develop a web application that solves a real-world problem. Therefore, I initiated and led a self-organized group project to create an Online Food Ordering System.

Project Goals:

Develop a user-friendly web application for customers to order food online from local restaurants.

Create a secure and responsive frontend using modern web technologies.

Implement a robust backend system to manage orders, menus, and user accounts.

Set up a database to store restaurant and menu data.

Ensure a visually appealing and intuitive user interface.

Languages:

- Fluent in English (written and spoken)
